EDUCATION

Lovely Professional University - Punjab *Expected in 07/2028*
Bachelor of Technology (B.Tech): Computer Science and Engineering

Delhi Public School - Dhenkanal *05/2024*
Science

MontFort School - Dhenkanal *05/2022*
Secondary Education: Matriculation

PROFESSIONAL SUMMARY

Enthusiastic Computer Science and Engineering student with strong expertise in full-stack development, cybersecurity, and AI-driven web solutions. Experienced in building responsive, animated, and secure platforms with modern technologies. Recognized for leadership, problem-solving, and contributing to global sustainability projects.

TECHNICAL SKILLS

- Languages: Java, JavaScript, TypeScript, Python
- Cybersecurity: Kali Linux, Vulnerability Assessment, OWASP Awareness
- Operating Systems: Linux (All Distributions), Ubuntu, Windows, MacOS
- Cyber Security : Encryption techniques,Application security, Mobile securit, Identity management, Scripting languages, Penetration testing, Social engineering, Cryptography, Operating system security, Log analysis, Wireless security, Secure coding, Virtualization security
- Web Technologies: ReactJS, HTML5, CSS3, Bootstrap
- Tools/Platforms: Git, GitHub, VSCode, AI Tools (ChatGPT, B10x)
- Soft Skills: Leadership, Communication, Collaboration, Problem Solving

EXPERIENCE

Cybersecurity Intern at Future Interns | Developer - Onl (Remote) *06/2025 - 07/2025*

- Monitored network traffic and analyzed logs to detect potential security breaches and anomalies.
- Supported the execution of security awareness training programs for employees, enhancing overall cybersecurity culture.
- Researched emerging cybersecurity threats and trends, providing insights for proactive defense strategies.

Cybersecurity Analyst Virtual Intern, Delloite AUS | Analyst - Remote *06/2025 - 06/2025*

- Monitored network traffic for unusual activity using intrusion detection systems.
- Conducted vulnerability scans and reported findings to improve system security posture.
- Documented security procedures and updated policies to comply with industry standards.
- Reduced risk of cyber attacks by conducting regular vulnerability assessments and penetration testing.

Edufyi Intern | CyberSecurity Engineer - Remote *02/2025 - 04/2025*

- Collaborated with cross-functional teams to enhance incident response procedures.
- Monitored network traffic for unusual activities, ensuring quick detection of anomalies.
- Developed documentation for cybersecurity policies and best practices.

PROJECTS

VNL Scanner
Developed a web-based security assessment tool that identifies vulnerabilities using advanced simulation techniques. The system leverages custom-trained methodologies to analyze websites for potential security issues, supporting educational use cases and research in web security. Designed to help users protect digital assets through comprehensive scanning and actionable insights.

CodeUnwanted
Built a versatile cryptography platform offering encoding and decoding utilities for developers, security professionals, and enthusiasts. The tool integrates multiple cryptographic functions within an intuitive interface, enabling users to securely process data while maintaining ease of use. Designed to support both beginners and advanced users in cybersecurity workflows.

Cyber Threat Scanner
Created an intelligent threat-detection system capable of scanning URLs for phishing, malware, and other online risks. The platform delivers real-time protection with detailed threat reports, helping users stay secure in the digital environment. Focused on rapid analysis and high-precision detection.

Cybersecurity Awareness Poster Maker
Developed a professional poster-creation platform tailored for cybersecurity awareness campaigns. The system includes an intuitive drag-and-drop editor, a library of security-themed icons, and high-quality export capabilities. Ideal for organizations aiming to enhance security culture through visually engaging materials.

Web Security Awareness Platform
Designed an interactive learning tool that educates users about common web vulnerabilities such as SQL Injection and Cross-Site Scripting (XSS). The platform incorporates hands-on demonstrations, visual examples, and clear impact analysis to improve understanding of real-world attack vectors.

Secure Guard
Engineered a modern cyber-protection suite featuring military-grade encryption, password-strength analysis, and advanced vulnerability detection. The system delivers instant, high-performance scanning and security insights, enabling users to identify threats proactively. Built to address the demands of today's digital security landscape.

CyberCipher
Developed a secure cryptographic application designed for security professionals, developers, and privacy-focused users. The platform implements military-grade Caesar cipher encryption with customizable shift values, instant decryption capabilities, and fully local data processing to ensure complete privacy. Features include authenticated access to restrict tool usage to authorized users, delivering a reliable and secure encryption environment.

ACHIEVEMENTS AND LEADERSHIP

- Developed an advanced, animated personal portfolio with API integration.
- Created environmental tech applications promoting water management and recycling.
- Qualified for the Top 3 Rounds of Hack-a-Throne National Hackathon.
- Selected for prestigious International Volunteering Program with AIESEC Sri Lanka.
- District-level Badminton Player - Runner-up.
- Leadership roles in GitHub Club and active participant in Google Club Coding Events.

CERTIFICATIONS

- SDG Hone Public Speaking - Lovely Professional University (2024)
- Achieved 8th position in an AWS hackathon among 600 participants.
- NCC Cadet - National Cadet Corps, Grade A (2022)
- B10x AI Tools and ChatGPT Certification (2024)
- Hack-a-Throne 1.0 - AIESEC Hackathon (2024)
- GeeksForGeeks Coding Competitions (2024)
- Student Ambassador - 1stop (2025)
- Internship - Edufyi Tech Solutions (2025)
- TechForge 2025 National Hackathon (2025)
- Deloitte Australia - Virtual Job Simulation Program (2025)
